COMPANY PROFILE

Who We Are?

ANM Denim operates as a subdivision of a prominent conglomerate, boasting a substantial annual turnover of 50 Million USD. The Group's journey dates back to its inception with the establishment of their initial facility in 1987. Over a span of four decades, they have transformed into a technologically advanced and quality-driven entity, encompassing fully integrated denim mills, and they have ambitious plans for the development of spinning mills in the future.

What We Do?

As a newly established denim mill, we have launched production with a strong focus on quality, versatility, and continuous product development. Our expanding collection showcases premium fabrics designed to meet evolving market demands.

Our cutting-edge production facilities and a team of skilled professionals guarantee that every fabric we produce meets the highest industry standards.

Sustainability is at the core of our operations we integrate eco-friendly practices throughout the manufacturing process, from responsible raw material sourcing to minimizing waste and optimizing energy consumption.

At ANM DENIM, we don't just make denim; we craft a sustainable future for fashion.

ANM DENIM PVT. LTD

WHERE SUSTAINABILITY WEAVES THE FUTURE GREEN

- We proudly source 50% of our energy from our state-of-the-art solar park, demonstrating our commitment to sustainability, innovation, and a greener future.
- Our ETP plant is fully operational, treating up to 200,000 gallons of wastewater daily.
- Our crafted fabrics are made from high-quality sustainable fibers.
- We offer Denims with recycled yarns, including PCW and PIW, and Organic Cotton Denims, with GRS, GOTS, RCS, and OCS certifications.

Dyeing

Our dyeing facility features two state-of-the-art slasher dye ranges with a total production capacity of 1.5 million meters. These advanced systems allow us to produce a diverse range of shades, including deep indigo, topping, and bottoming colors, ensuring rich, consistent and high-quality finishes. With a focus on precision, efficiency and sustainability, our dyeing process enhances fabric performance while minimizing environmental impact.

Weaving

Our weaving facility utilizes advanced Picanol Airjet and Rapier technology for high-speed, precision fabric production.

- State-of-the-art Picanol weaving machines ensure speed and consistency.
- Omniplus-1-2-P 220 (ABB0110-2-P22 220) enables diverse textures and finishes.
- HFGA128 Direct Warping Machine ensures uniform tension and durability for blended fibers.
- 1.5 million yards/month capacity for high-volume production without quality compromise.

With cutting-edge technology, we deliver strong, smooth, and high-performance denim that meets evolving industry demands.

Finishing

- Singeing, Mercerizing, Washing & Pre-Shrink
Enhances fabric smoothness, removes surface impurities, and ensures dimensional stability.
- Permashrink Sanforized Rubber Shrinkage Control
Ensures controlled shrinkage and improved dimensional stability for consistent performance.

Advanced Inspection Machines – Guarantees defect free fabrics through meticulous quality checks.

Inspection (Plait-to-Roll) & Shrink-Wrapping Machine
Ensures fabric quality control and secure packaging for optimal storage and transportation.

Advance Washing

- Implementing enzyme wash processes for softening and distressing denim.
- Creating a distressed and vintage look by mechanically abrading the denim.
- Ensuring proper safety measures due to the use of potentially hazardous chemicals.
- Enabling detailed patterns and intricate designs on denim.

Advance Laboratory

Our state-of-the-art laboratory ensures quality, performance, and compliance through advanced testing. Fabric Testing - Strength, shrinkage, colorfastness, and durability.

Shade Matching & Spectrophotometer Ensures precise color consistency.

Chemical & Physical Testing - Verifies eco-compliance and fabric composition.

Tensile, Tear Strength & Stretch Recovery - Ensures durability, flexibility, and longevity.

With strict quality control, we deliver reliable, high performance denim that meets global standards.

Research & Product Development

Our R&D and Product Development teams drive innovation, sustainability, and performance in denim manufacturing.

New Fabric Development Exploring fiber blends, weaving techniques and dyeing innovations.

Sustainable Solutions Implementing eco-friendly materials, water-saving dyeing, and low-impact finishing.

Performance Enhancement Developing advanced stretch, durability, and comfort features.

Customization & Trends Tailoring fabrics to evolving market and brand needs.

Advanced Wash & Dyeing Creating deep indigo, topping, and bottoming shades.

Prototyping & Testing Rapid sampling to ensure quality and consistency.

Through continuous innovation, we deliver high-quality, trend-driven and sustainable denim fabrics.

OUR VALUED CUSTOMERS

Trusted for decades, delivering quality denim with every dispatch - your history of excellence begins with us.
